

ATMIST Handover Template

A clear structure for simulated clinical handover practice

Purpose

ATMIST helps organise essential information during transfer of care. Keep the handover concise, factual and relevant.

Practice tip

Prepare the structure early, update it as the casualty changes and confirm that the receiving clinician has understood critical information.

Letter	Heading	Record
A	Age	_____
T	Time	_____
M	Mechanism / medical complaint	_____
I	Injuries / information found	_____
S	Signs and trends	_____
T	Treatment and response	_____

Do not include identifiable patient information in notes, practice scenarios or reflections.
