

CPD Reflection Guide

Turn an experience into a focused learning record

1. Description

What happened? Describe the situation without including identifiable patient information.

2. Evaluation

What went well, what was difficult and what influenced the outcome?

3. Learning

What did the experience teach you about knowledge, communication, teamwork, judgement or systems?

4. Evidence

Which policies, guidelines, teaching materials or professional standards should you review?

5. Action plan

State one or two specific changes you will make and how you will know they helped.

Do not include identifiable patient information in notes, practice scenarios or reflections.
