

MARCH PAWS Recall Card

A compact revision prompt for training use

How to use this card

Use the sequence as a structured prompt while continually reassessing the casualty. This is not a replacement for current authorised clinical guidance or practical training.

Core behaviour

Identify urgent threats, act within your scope, evaluate the response, communicate clearly and repeat the assessment when the situation changes.

Step	Prompt	Revision focus
M	Massive haemorrhage	Identify and control immediately life-threatening external bleeding, then reassess.
A	Airway	Assess whether the airway is open and likely to remain open.
R	Respiration	Assess breathing and identify urgent thoracic problems according to current guidance.
C	Circulation	Assess perfusion, shock and ongoing blood loss; treat and reassess.
H	Head / hypothermia	Consider neurological injury and prevent avoidable heat loss.
P	Pain	Use authorised pain management appropriate to the casualty and situation.
A	Antibiotics	Consider only where indicated and authorised by current protocol.
W	Wounds	Expose, inspect, protect and document wounds appropriately.
S	Splinting	Immobilise relevant injuries using appropriate equipment and technique.

Do not include identifiable patient information in notes, practice scenarios or reflections.
